

Health Guarantee

Coverage and terms

This guarantee accompanies and is incorporated into the Reservation Agreement between Purrfectly Plush (“we,” “us,” “the Cattery”) and the buyer named there (“you”). It applies to the kitten identified in that Agreement.

The foundation behind this guarantee

Both parents of your kitten are health-tested. They are PKD1-negative by DNA, blood-typed, and test negative for FeLV and FIV. We test parents precisely because the breed’s two headline genetic conditions — polycystic kidney disease and hypertrophic cardiomyopathy — typically appear later in life than any reasonable guarantee window can reach. Our testing answers the late-onset questions; this guarantee covers early-onset hereditary defects.

Condition at homecoming

Before your kitten comes home, they are examined by a licensed veterinarian and found to be in good health, current on age-appropriate vaccinations, dewormed, and microchipped. We disclose any known condition in writing before homecoming.

Your initial veterinary examination

You agree to have your kitten examined by a licensed veterinarian of your choice within three (3) days of homecoming, at your expense. This visit establishes your kitten’s health at the moment they enter your care. If that examination identifies a serious congenital defect present at homecoming, we will provide a replacement kitten of comparable quality from a current or future litter once the condition is confirmed in writing by your veterinarian. Failing to complete this examination within the window releases us from claims that the examination would have identified.

Three-year hereditary guarantee

For three (3) years from your kitten’s date of birth, we guarantee your kitten against life-threatening hereditary defects, including the genetic diseases recognized in the breed. If a licensed veterinarian diagnoses such a defect within this period, and it is confirmed in writing with supporting diagnostics, we will provide a replacement kitten of comparable quality from a current or future litter. This guarantee outpaces the breed standard because our breeding cats are tested; it reflects earned confidence, not a gap to hide.

The remedy

Our remedy under this guarantee is a replacement kitten, not a cash refund. You are not required to return a living kitten to receive a replacement; the lifetime return policy in the Reservation Agreement governs that choice separately. In the event of death, a replacement requires a licensed veterinarian’s necropsy, at your expense, confirming a covered hereditary or congenital cause. A replacement kitten is your sole and exclusive remedy under this guarantee. We do not reimburse veterinary or other costs, and our total liability never exceeds the price paid for your kitten.

Making a claim

To make a claim, notify us in writing within seven (7) days of your veterinarian’s diagnosis and provide the supporting veterinary records — and, in the event of death, the necropsy findings.

What this guarantee asks of you

This guarantee remains in force only while you maintain your kitten’s health and follow basic responsible care: keeping vaccinations current on your veterinarian’s schedule, feeding an appropriate high-quality diet, keeping your cat indoors, and never declawing. Conditions arising from injury, accident, neglect, inappropriate diet, exposure to other animals, or failure to follow veterinary guidance are not covered.

What is not covered

Minor and common kitten conditions that are treatable and present at homecoming (such as intestinal parasites, coccidia, giardia, or a mild upper-respiratory infection) are not defects under this guarantee and are disclosed if present. Illness or injury arising after homecoming from environment, diet, stress, exposure, or accident is not covered. Conditions that are not hereditary in nature are not covered.

To you alone

This guarantee is extended to you as the original buyer and is not transferable. If you can no longer keep your cat at any point, the lifetime return policy applies and your cat returns to us.
